### Watchtower

☒ Check for compromised websites

Check saved websites for recent security breaches. No information about your items leaves your device.

Update Now

Last updated: 7 hours ago

☒ Check for vulnerable passwords

Look up saved passwords in an online database of security exploits provided by [haveibeenpwned.com](#). This feature may pose a small risk to people who reuse similar passwords. [Learn more](#)

☐ Check for two-factor authentication

Check for login items that support two-factor authentication. No information about your items leaves your device.

☒ Ask before checking for a secure connection

Always ask before checking if a website supports a secure connection. No private information will be sent.

[Learn how Watchtower protects your privacy.](#)

### Menu Items

☐ Copy UUID

☐ Copy JSON

These items will show up in the Item menu

### Integrations

☒ Enable Spotlight and 3rd party app integrations

Export unencrypted item titles, urls, categories, account and vault names so that Spotlight and application launchers like Alfred, Quicksilver, and LaunchBar can find 1Password items.

### Sorting

☐ Show numbers and symbols first

### Local Vaults

☐ Allow creation of vaults outside of 1Password accounts

Enabling this feature will create a Primary vault on your Mac. You will use the Primary vault to unlock 1Password from now on.
