General

- ☑ Launch Yoink at login
- ☑ Show menu bar icon
- ☐ Occasional reminder to review Yoink
  Yoink would like to invite you once every six months (if there's been an update) to rate or review it on the Mac App Store.
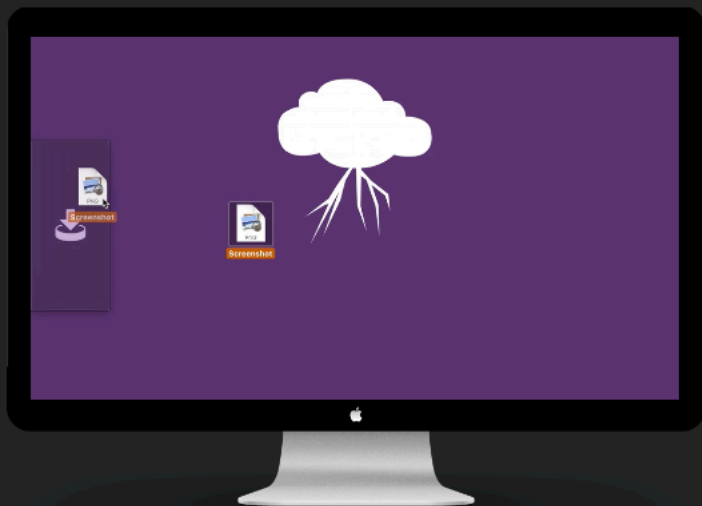

Appearance: System Appearance

Behavior

☑ **Automatically show Yoink...**

...when a drag starts ⬍

To temporarily prevent Yoink from showing, keep the
fn key on your keyboard pressed during drags.

Toggle Yoink: Record Shortcut

Long-press to restore previously removed files,
double-press to save the clipboard's contents.

Ignored Applications: Edit...

Extensions

☑ **Remove items when dragged out**
Keep the fn or shift key on your keyboard pressed
when dragging out to temporarily change this setting.

☑ **Combine multiple files to a stack**

☑ **Show Quick Look Previews instead of file icons**

☐ **Show favicons for webloc files**
Yoink will load data from the internet for each webloc file added.

☐ **Resolve alias files to their destination when added**
Implemented experimentally due to macOS's sandbox
environment.

Provide ☐ JPG ☐ PNG data for dragged-out ☐ TIFF ☐ HEIF ☐ WebP files

Data is provided in addition to the dragged, original file.
Receiving apps pick their preferred data type.

☐ **Reduce Motion**

General   Behavior   Advanced   **Force Touch**   Extensions

Force click a file to: select all files in Yoink ⌄

☐ Haptic feedback when dragging to Yoink

☐ Enable Clipboard History

The clipboard history keeps a record of your last few copied objects, allowing you to access them from Yoink or its widgets even if you've copied something else already.

Remember the last 12 ⬍ copied items.
